Product Description

Sentinel RMS is a software licensing SDK for your application(s). It increases revenue by authorizing the use of your application(s) and offers a variety of licensing schemes to boost your product sales. It also provides tools that system administrators can use to track and manage licenses in a network.

Sentinel Cloud Licensing (SCL) add-on for RMS combined with the license enforcement features of Sentinel RMS and the entitlement management features of Sentinel EMS; makes a complete solution that provides the benefits of cloud-connected licensing to applications deployed on the customer's network or hosted online. Usage collection and reporting is the most significant advantage obtained with cloud-connected licensing.

About This Document

This document contains details about the new features, enhancements, and installation of v9.6.0 of Sentinel RMS. The last major release was Sentinel RMS v9.5.0.

What's New in this Release

This section lists down the new features included in Sentinel RMS v9.6.0 release.

Termination of Active User Sessions

In this release, the Sentinel RMS License Manager administration library has been introduced.

This library provides a set of APIs that are used to terminate active sessions for a particular user and host. Termination is performed by the end user admin by logging on (either physically or remotely) to the machine where the License Manager is installed.

For more information, refer to the [Sentinel RMS Developer's Guide](#) and [Sentinel RMS API Reference Guide](#).

API Builder Enhancements

Java and .NET Support for API Builder

The API Builder has been enhanced to support code generation for .NET (C# and VB.NET) and Java programming languages. This is in addition to C language that was already supported. To achieve this, user interface changes have been implemented.

Get Licensing Information API Function

The LockCode Info query (for the `sntl_licensing_get_info` API) is now available for use with the Sentinel RMS API Builder. This is applicable to C, .NET, and Java programming languages.

Support for Microsoft Visual Studio Version(s) Independent Libraries

From Sentinel RMS v9.6 onwards, a single library set is available for all the supported versions of Microsoft Visual Studio compiler(s). For more information, refer to the [Sentinel RMS Developer's Guide](#).

Sentinel Cloud Licensing Version 5.1

Sentinel RMS v9.6.0 supports Sentinel Cloud Licensing (SCL) v5.1.

Issues Fixed in this Release

The following issues have been corrected in this release.

Internal Tracking ID	Description
SM-49682	Unable to load SLM_HYSYS_Runtime license (from license configuration file) onto the License Manager. Checksum collision causing problem during initialization of distribution criteria table.
SM-40831	Error received while trying to retrieve information using lsmon and lspool utilities for redundant License Managers.
SM-54922	Support for VM detection for Hyper-V (v10.0.16299.15): Windows 10 (v1809).
SM-54809	Fix End User License Agreement (EULA) for Sentinel RMS 9.5 (library and version usage).
SM-39615	Number of licenses on the License Manager keeps increasing after each refresh.
SM-54311	Upgrade Mini XML version from 1.1 to 3.0: Remove references to LGPL in EULA.
SM-57423	The memory leak issue with the VLSverifyRevocationTicketExt API has been fixed.
SM-57725	Error code 210011 is returned when a commuter authorization is checked without specifying feature and version in the Unified API.
SM-34894	Revocation ticket generation (using API) fails when the permission ticket is generated using more than one license.
SM-56734	Debugger-detected error message box cannot be displayed when a Sentinel RMS Envelope-protected native DLL is loaded by a .NET executable.
SM-60971	VLS_CALLING_ERROR (status code 11) is received when VLSgetAndInstallCommuterCode is called using the challenge data of maximum size (30 characters).
SM-62337	Error 210133 is returned when either the application runs for a long time or there are long breaks between queries.
SM-61970	Daylight Saving Time is not considered while comparing cancel lease time stamp and lease birth time.
SM-55959	All references of ReportDB.mdb removed from the Sentinel RMS System Administrator's Guide.
SM-18779	All APIs except LSUpdate fail when the primary leader server in the redundant server pool goes down.

Internal Tracking ID	Description
SM-53188	The user can manually resize the API Builder interface window depending on the business requirement or comfort level.
SM-53193	The Generated code pane in the RMS API Builder interface has been enhanced to allow selecting fragments of the code using the mouse. The selected code can be copied and pasted using the keyboard shortcuts (Ctrl+C and Ctrl+V).
SM-54023	On the landing page of API Builder, the Help (?) icon is added at the top-right corner of the screen. This icon is used to launch the help section for API Builder in the Sentinel RMS API Reference Guide (hosted online).
SM-56876	The Execute button in the RMS API Builder interface is now displayed along with the API parameters (bottom-right corner of the top pane).
SM-56321	The order in which the API parameters are displayed in the RMS API Builder interface has been changed. This has been done to provide improved usage and functionality. This is applicable to create context, login with attributes, refresh with attributes, and logout with attributes API functions.
SM-52977	The language selected by the user is applicable until the user selects a different language. This is true even if the user switches to a different API or relaunches the application.
SM-59511	Unable to fetch license using syncLicenseJobInfo API; however success message is returned.
SM-60967	Scheduler shutdown signal is not reset when sntl_scp_clean API is called.
SM-62338	For Java interface, error 200004 is returned when sntl_lease_demo API is called to fetch lease from cloud.
SM-61884	Wrong error code is returned by sntl_licensing_get_info API when lease is in suspended state.
SM-55476	Move node registration with Yellow Page Server (YPS) to a separate thread to allow licensing transactions.

System Requirements

The following table provides the minimum hardware and software requirements for Sentinel RMS.

Hardware Requirements	Software Requirements	
Processors <ul style="list-style-type: none">> x86 processors for 32-bit> x86-64 processor for 64-bit	Operating System (32-bit) <ul style="list-style-type: none">> Windows 7> Windows 8.1> Windows 10 v1903> Windows Server 2008	Operating System (64-bit) <ul style="list-style-type: none">> Windows 7> Windows 8.1> Windows 10 v1903> Windows Server 2008> Windows Server 2008 R2> Windows Server 2012> Windows Server 2012 R2> Windows Server 2016> Windows Server 2019
Hard Disk (Minimum) <p>Approximately 1.8 GB free hard disk space is required to install Sentinel RMS.</p>	Microsoft Visual Studio Version <ul style="list-style-type: none">> Visual Studio 2010 Professional edition v10.0.30319.1 RTM (32-bit and 64-bit)> Visual Studio 2012 Professional edition v11.0.60610.01 update 3 (32-bit and 64-bit)> Visual Studio 2013 Professional edition> Visual Studio 2015 Professional edition v14.0.25431.01 update 3> Visual Studio 2017 Professional edition> Visual Studio 2019 Professional edition	

Hardware Requirements		Software Requirements
RAM (Minimum)	RAM (Minimum)	Java Development Kit (JDK) Java SE 7, Java SE 8
Operating System (32-bit)	Operating System (64-bit)	Web Browser (for viewing HTML Help)
Windows 7 (1 GB)	Windows 7 (2 GB)	> Microsoft Internet Explorer
Windows 8.1 (1 GB)	Windows 8.1 (2 GB)	> Mozilla Firefox
Windows 10 v 1903 (1 GB)	Windows 10 v1903 (2 GB)	> Google Chrome
Windows Server 2008 (2 GB)	Windows Server 2008 (2 GB)	PDF File Viewer (for viewing PDF documents) Adobe Acrobat
	Windows Server 2008 R2 (2 GB)	
	Windows Server 2012 (2 GB)	
	Windows Server 2012 R2 (2 GB)	
	Windows Server 2016 (2 GB)	
	Windows Server 2019 (2 GB)	

Installation Information

This section contains important information related to the installation of Sentinel RMS SDK v9.6.0.

Before installing the Sentinel RMS SDK, ensure that you have the following:

- > Administrator Privileges: You must have administrator privileges to successfully install all the components.
- > Sentinel RMS SDK Serial Number: You require a valid serial number provided by Gemalto. The installer prompts you to enter the serial number provided to you.

Installation Instructions

1. Double-click *StartHere.exe* from the root of the installation media. The Start Here screen appears.
2. Click **Install under Sentinel RMS Development Kit 9.6.0 Software**. The Welcome screen appears.

NOTE If you are installing the RMS SDK using the steps described here, you need not click the **Install** option under Sentinel RMS License Manager Installer. This option is for only installing the Sentinel RMS License Manager, which is automatically installed as a part of the SDK on your system.

3. Click **Next**. A screen showing the license agreement appears.
4. To proceed, accept the license agreement and click **Next**.
5. In the Customer Information dialog box, type your name, organization name, and the RMS SDK serial number. This serial number is contained in the Gemalto Sentinel Order Credential e-mail and is unique to each vendor.
6. You may modify the SDK installation directory. The default installation directory is:
 - On 32-bit machines - <OSdrive>:\Program Files\SafeNet Sentinel\Sentinel RMS Development Kit\<version>\
 - On 64-bit machines - <OSdrive>:\Program Files (x86)\SafeNet Sentinel\Sentinel RMS Development Kit\<version>\
7. Select the **Complete** or **Custom** installation option.

NOTE The Custom installation option for the RMS SDK cannot be used on non-English operating systems.

8. You are prompted for modifying the system firewall settings. Choose between the following options:
 - Select the check box to allow communication with the License Manager. This setting adds the License Manager to your system firewall's exceptions list.
 - Clear the check box to block communication with the License Manager (not recommended).
9. Follow the on-screen instructions to finish the installation.

Installed Directories

The following directories/files are installed:

Directory	Description
Development	Contains all the RMS libraries, header files, XSDs and source code for licensing and customization.
Manuals	Contains the various documentation items for Sentinel RMS.
Redistributable	Contains the utilities and files for your customers, including the Sentinel RMS License Manager installer.
Samples	Contains the sample programs for demonstrating the use of various RMS features and API.
VendorTools	Contains the utilities and files for your use. <div data-bbox="591 743 1432 884"> NOTE The license generator is no longer included with the SDK. The order e-mail contains a link that enables you to download the license generator.</div>
install.rbo	Contains information about Sentinel RMS SDK version and serial number.
ReleaseNotes	This file.

Sentinel RMS Documentation Resources

The following are the major documentation resources for the product.

Sentinel RMS SDK Solution Guide

This guide provides the complete overview of Gemalto's Software Monetization solution. You can use this guide to prepare a comprehensive monetization strategy prior to integrating licensing technology with your software and business processes.

> To view the online version of the latest document, [click here](#).

Sentinel RMS SDK Developer's Guide

This guide contains the complete product overview, the necessary information for licensing and distributing the applications. Useful for developers planning and implementing licensing. To access, use the following ways:

> To view the online version of the latest document, [click here](#).

Sentinel RMS SDK API Reference Guide

This guide contains details about all the API functions, including the licensing library, system initialization, and so on. Useful for developers integrating the API functions in the code. To access, use the following ways:

> To view the online version of the latest document, [click here](#).

Sentinel RMS SDK System Administrator's Guide

This guide contains details about using the system administration and License Manager configuration options. Useful for the System Administrator of the end user (on the customer site). To access, use the following ways:

> The HTML version installed on the system can be accessed using the Doc Access Page (.htm) in the Manuals directory.

> To view the online version of the latest document, [click here](#).

License Generation API Reference Guide

This guide contains details about the License Generation API functions. To access, use the following ways:

> To view the online version of the latest document, [click here](#).

SCP (Sentinel Cloud Plug-in) Installation and Configuration Guide

This guide describes the installation and configuration procedure for SCP used for cloud-served lease deployments. This is applicable for Windows, Linux, and MAC operating systems. Additionally, it describes the components included in the SCP package for serving cloud-connected deployments.
